Experience

Frontend Developer

PT Digital Forte Indonesia • February - August 2025

- Developed a daycare management application to streamline parent-teacher communication, child attendance tracking, and daily activity.
- Built a security web application to manage employee profiles, attendance, checkpoints, and patrol operations.

Education

SMK Plus Pelita Nusantara

Software Engineering

July 2023 - Present

Skills

- HTML
- CSS
- JavaScript
- Bootstrap

Skills

- PHP
- Laravel
- Tailwind CSS
- React.js

Language

- Indonesian — Native
- English — Basic

Projects

Shopping List App

Simple shopping list app built with React.js. Users can add, edit, and delete items — perfect for managing daily groceries or keeping track of purchased goods.

Cashier App

Cashier system built with Laravel. This project handles product management, checkout processes, and basic transaction flow similar to a retail POS system.

Landing Page Coffeeshop

Landing page for a coffee shop built with HTML, CSS, and JavaScript. Designed with a warm aesthetic to showcase products, offers, and the brand's identity effectively.

MyWeeabooList App

App inspired by MyAnimeList. This project allows users to browse, search, and manage their favorite anime titles in a clean and responsive interface.
